WIRELESS TALLY SYSTEM

Tec-Tally | TTally433 | TTally4G

Support your multi-camera workflow with **local** and **remote** Tally signals.

Distance is No Limit

Wireless Tally System for Local & Remote Production

The all-scenario Tally display system combines the 433MHz frequency band with full-network 4G connectivity, meeting the needs of both local live broadcasts and remote live productions, as well as hybrid setups combining local and remote production.

It greatly facilitates PGM and PVW signal display for marathons, cultural tourism events, remote production, and more.

Top Sunshade Design

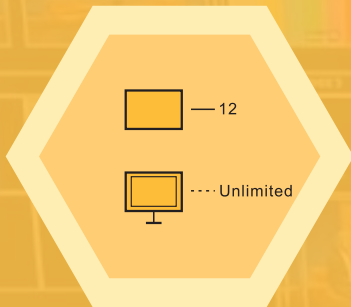

Clearibility under strong sunlight.

Stay visible outdoors with the top sunshade that blocks glare in bright sunlight.

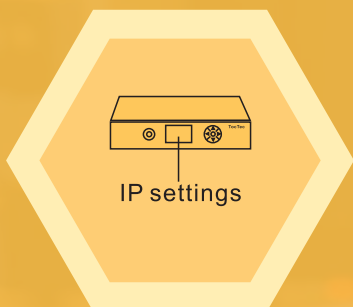

Multi-Channel Display

Monitor multiple cameras at a glance with a 12 channels on hardware or unlimited channels on software switchers.

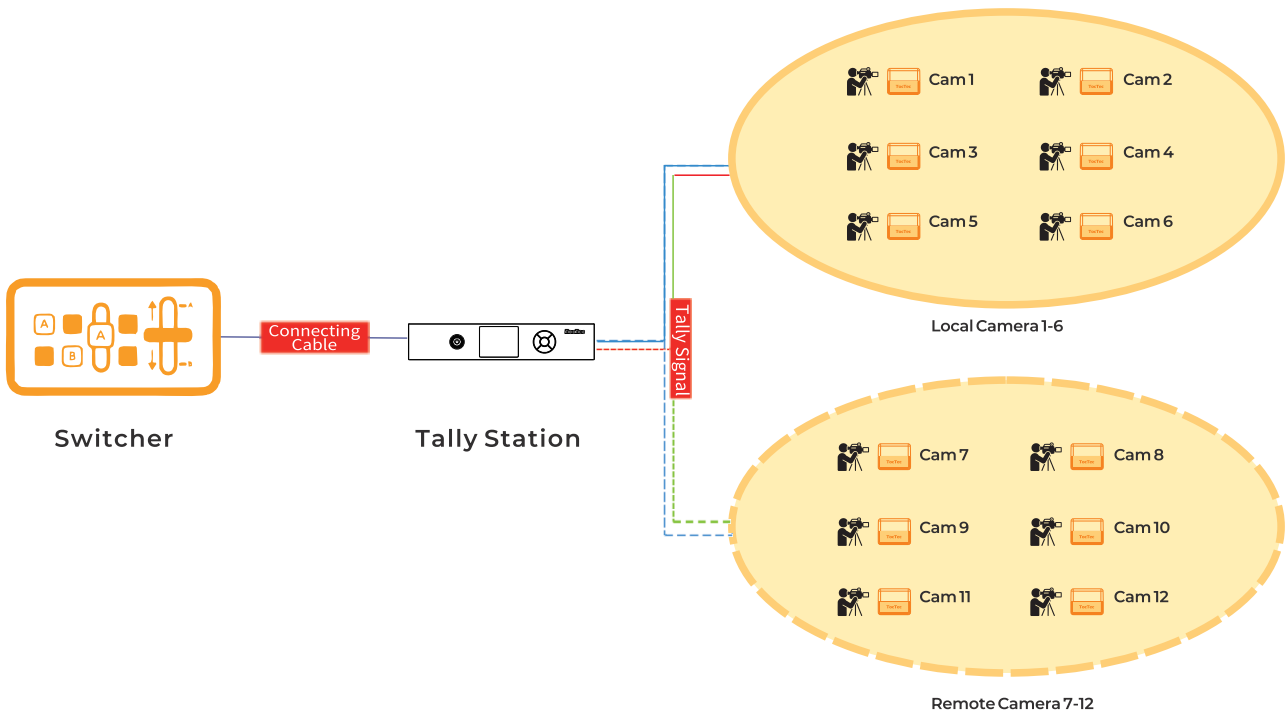

Network Customization

Set IP addresses on screen to match BMD or vMix switchers quickly and intuitively.

Why Special?

Applications - Where Tally Has No Limits

 <p>Local Studio & OB Vans 433MHz: Ultra-Low Latency</p>	 <p>Remote Sports & Marathons 4G: Unlimited Range & Coverage</p>	 <p>Hybrid Cross-location Events Dual-Mode: Seamless Local/ Remote Sync</p>
